

Our REI Mastery U Protection & Privacy Mastery Course is a deep dive into the basis of legal liability and the vehicles to help protect you and your assets, as well as keep them private!

This Mastery Course is an online educational program with both video and printed content. The materials are only available online through our website. While it can be purchased separately from other Mastery Courses, access to the content is restricted to members only. So, you will need a membership account on our site. Those start at \$99 (one month access) for our Rookie Investor Program. Our Professional Investor Program includes one year membership. All students in REI Mastery Coaching programs also receive a year's membership. Once a member, you can add on any Mastery Course. All memberships except the Rookie Investor Program are renewing memberships that decrease in cost after the first year.

This Protection & Privacy Mastery Course includes the following:

1. The **full video** to the live Mastery Course taught in April of 2019. This live class was almost 3 1/2 hours in length. The video is broken down into 3 sections for easy reference. Here is the video's content:

Part 1: Liability Generally: Don't miss this part. Understanding where and how you run into liability is the first step to prevent it. It's not what you think! There are various types of liability coming from different directions. And you protect yourself differently depending on the kind of liability. This part covers where liability originates in a simple and easy to understand analysis.

Part 2: Business Structures: The business entity, usually an LLC but sometimes other kinds of business structures, are the foundation of every asset protection plan. There is really no way to be involved in real estate and not have a business entity set up. But, the choice of business entity depends not only on what the business is doing, but what the business is protecting. We start with a very simple example of protection for the new investor and then build assets as well as additional protection vehicles.

Part 3: Trust Structures: This section covers the various trusts that are used in real estate in depth. There are various kinds of trusts that are used for different reasons. Some provide protection, others provide privacy and some are used for control. This is a deep dive into not only what these trusts are but also how to use them.

2. The presentation **slide deck** to the 2019 live class to follow along with the video.

There is no textbook or exam with this mastery course.

FOR ALL ADDITIONAL PROTECTION AND PRIVACY EDUCATION, please see our Asset Protection Public Library on our website! This is were we keep our short (3 - 5-minute) video content on various aspects of forming and using asset protection structures. Everything from how to sign contracts to how to move money between the structures, you'll probably find all answers to all your questions! This library is updated with new content all the time.
